Linux Systems / Database Administrator

Interested in Open Source technologies? Are you a Linux expert?

We need a skilled system administrator with strong database administration and tuning skills to add to our friendly and very talented Information Systems (IS) team.

We offer a competitive salary, lucrative bonus program, and excellent benefits.

Grant Street Group is a Software as a Service pioneer, hosting in 1997 the world's first online bond auction for the City of Pittsburgh, Pennsylvania. Since this first auction, over 3,800 clients have used our software to process financial transactions exceeding $12 trillion.

Today, Grant Street Group is a growing company providing Software as a Service in fields such as electronic payments, auctions, and tax collection and billing. Our customers include banks, financial companies, and state and local governments.

The IS team is responsible for the administration of all servers, networks, and databases in multiple data centers and public clouds. The team oversees information security across the technology spectrum. This position will be involved in the day-to-day administration, diagnostics and troubleshooting of IS resources and new IS projects.

Required experience:

- Expert in Linux systems administration

    - UNIX administration experience may be substituted, but a very strong knowledge of Linux is required

    - Administration of medium-large data center environments

    - High-Availability and Disaster Recovery architectures

    - Performance Analysis and Tuning

    - DNS, DHCP, RADIUS, LDAP, Apache, SSL, mod_perl, SMTP, IMAP

    - Perl and shell scripting

    - RHCE certification or equivalent experience

- Expert in MySQL database administration

    - Other RDBMS administration experience may be substituted, but knowledge of and experience with MySQL is required

    - High-Availability database architecture design and implementation

    - MySQL replication and backups

    - Performance analysis and tuning

    - MySQL 5.0 DBA certification or equivalent expertise

- Excellent analytical thinking and problem solving skills

- Excellent organizational, decision making and communications skills

- Excellent grades and a track record of success

Experience with any of the following is helpful:
- Percona Toolkit/Maatkit, Galera, Tungsten Replicator

- Spacewalk/Satellite server, Puppet, Chef

- AWS

- VMWare, KVM, Xen
